

CONGRESSMAN
JOHN SARBANES
REPRESENTING MARYLAND'S 3RD CONGRESSIONAL DISTRICT

Sarbanes Working for Baltimore County

Economic Development:

- **Help Business Development Get Back on Track**—The American Recovery and Reinvestment Act created a new type of public private partnership, Recovery Zone Facility Bonds, that will help private business development in communities hit hardest by our economic downturn. Baltimore County will leverage \$26 million in federal tax cuts to issue bonds financing projects valued at over \$38 million. The following projects have been selected by Baltimore County:
 - Home Run Lodging, LLC will construct a five story, 105-room Hampton Inn in Owings Mills
 - Towson City Center, LLC will redevelop a vacant 12-story building into 155,000 square feet of Class A office and retail space overlooking Towson Circle
- **Connecting Small Business Owners to the Federal Regulators**—In July, I joined officials from the Federal Reserve Bank of Richmond in a small business roundtable discussion in Baltimore City. This event brought together small business owners, lenders and regulators to discuss issues impacting access to credit and technical support for Maryland small businesses. Emerging themes, best practices and common challenges will be presented at a national Federal Reserve Board of Governors event to elicit concrete actions that can be taken by the Board, national policymakers, federal agencies and other stakeholders to help small businesses.
- **Helping GM Innovate and Expanding Manufacturing Jobs in Baltimore**—The GM Powertrain Baltimore plant in White Marsh will produce next generation two mode rear wheel drive motors and related electric drive components. This new mission will create more than 200 jobs in the eco-friendly White Marsh facility. GM came together with federal, state and local government to leverage funds to expand the existing facility. Through the Recovery Act, the U.S. Department of Energy provided a \$105 million grant to GM for manufacturing electric drive systems. GM has committed \$129 million to the project, Maryland will provide \$4.5 million and Baltimore County will invest up to 6 million in grants in the expanded facility. The new hybrid transmission produced at White Marsh will be used in the Chevy Volt. I will continue to advocate for federal funding for innovative projects like the GM White Marsh facility which provide jobs for people in Baltimore and furthers the deployment of practical alternative energy solutions.

Transportation:

- **Investing in the MARC Commuter Rail System**—I am a strong supporter of MARC and, more generally, a robust public transportation system in Maryland. I share the frustration felt by riders with the recent problems and unpredictability with MARC. In order to make MARC more reliable, I have worked in the Congress to secure \$23 million in additional capital funding to upgrade railcars and parking facilities. The Recovery Act also provided over \$90 million for the MARC system to fund a new public address system and upgrades at the BWI MARC Station.
- **Improving Baltimore's Public Transportation System**—I believe that public transportation offers a cost-effective, safe, and reliable means of travel for many residents of Baltimore. Baltimore currently has buses, light rail and subways that help many move around the City and get to work. Through the Recovery Act funding, the Maryland Transit Administration was able to invest \$27 million in purchasing 16 new buses and upgrading bus facilities in the Baltimore area. The MTA also invested \$17 million in light rail parking expansion and infrastructure upgrades. Finally, the MTA will use \$39 million to install a new public address system, upgrade the tracks as well as make repairs to bridges and tunnels along the Baltimore subway.

Chesapeake Bay:

- **Supporting the Science and Environmental Education of Bay Restoration**—I introduced the Chesapeake Bay Science, Education and Ecosystem Enhancement Act of 2009, which reauthorizes the National Oceanic and Atmospheric Administration's (NOAA) Chesapeake Bay Office. This legislation increases collaboration between the various programs and activities to further NOAA's coastal resource stewardship mission. The NOAA office oversees the

To learn more about how you can become involved in restoring the Chesapeake Bay please visit www.chesapeakebay.net.

The Small Business Development Center (SBDC) can provide management, training and technical assistance. For more information visit www.mdsbdc.umd.edu or 1-877-421-0830.

- Chesapeake Bay Interpretative Buoy system which is a system of buoys that reports real-time weather and environmental information such as wind speed, temperature, and wave height. To access the real-time information please visit www.buoybay.org. The legislation also strengthens the Chesapeake Bay Watershed Education and Training (B-WET) Program which is a competitive grant program that supports existing environmental education initiatives, fosters the growth of new programs, and encourages the development of partnerships among environmental education groups throughout the entire Chesapeake Bay watershed. Finally, the legislation will also assist watermen on the Chesapeake by expanding technical assistance that NOAA offers beyond native oyster populations to include fish and shellfish aquaculture. This bill will focus the relevant science, research and resource management capabilities of NOAA as they apply to the Chesapeake Bay.
- **Giving People Access to the Chesapeake Bay**—I have introduced legislation to reauthorize the Chesapeake Bay Gateways Network (CBGN), a program that connects those who live in the Bay watershed to the natural, cultural and historic resources of the Bay and thereby encourages individual stewardship of these resources. The CBGN program has grown to include more than 150 sites and over 1500 miles of established and developing water trails in six states and the District of Columbia. Through grants to parks, volunteer groups, wildlife refuges, historic sites, museums, and water trails, the Network ties these sites together to provide meaningful experiences and foster citizen stewardship of the Chesapeake Bay. Gateway sites in Baltimore County include North Point State Park and Gunpowder Falls State Park.
- **Engaging Individual Citizens in Restoring the Bay**—I recently introduced the Save the Bay Homeowner Act of 2010 (H.R. 6382), legislation that would help the 17 million citizens of the Chesapeake Bay watershed to become citizen stewards of the Bay and give them an active role in restoring it. The legislation directs the EPA to develop a “Save the Bay Home” designation program that identifies various steps homeowners could voluntarily take around their property to reduce nutrient and sediment runoff and improve water quality in local streams and rivers that feed into the Bay. If a participating home meets certain standards, examples of which could include installing rain barrels or reducing fertilizer on lawns, that home could be designated a “Save the Bay Home.” The bill further directs the EPA to give credit to states and local jurisdictions for nutrient and sediment level reduction based upon the number of homeowners that achieve the “Save the Bay Home” designation.

Workforce Development:

- **Keeping Teachers in the Classroom**—Due to the recent economic downturn, Baltimore County and other local governments are faced with cuts to basic services and layoffs of critical personnel like teachers and first responders. I voted for legislation that would give Baltimore County schools and other local school districts in Maryland emergency funding that prevented more than 2,200 teacher layoffs in Maryland and 300 teachers in the 3rd Congressional District from impacting classrooms this school year.
- **Helping Individuals Transition Back into the Workforce**—The Baltimore County Office of Workforce Development (BCOWD) provides vital support and training to those who are trying to get back into the workforce. The American Recovery and Reinvestment Act provided over \$700,000 to support the 2 One-Stop Career Centers in Baltimore County. Through the One-Stop Career Centers, the BCOWD provides assistance to those looking for jobs including individual placement assistance, resume review, interviewing techniques, computer and other technical skills training.
- **Training Workers for Green Jobs**—Through a Recovery Act grant, Maryland received more than \$5 million to train 1,500 individuals and place them in energy-efficient employment in four different green industries. The project will be implemented through a regional partnership with businesses, community colleges, labor apprenticeship programs and the One-Stop Workforce System. The project will also improve manufacturing sustainability practices and waste stream management, develop and expand green construction training options and assist workers as they pursue careers. Participants will earn certificates or degrees in waste stream management, environmental technology, renewable energy or green construction.
- **Helping the Unemployed**—Everyday I hear from people who are struggling to make ends meet during these difficult economic times. For this reason, I supported legislation that has extended unemployment benefits and the COBRA health insurance subsidy for unemployed workers through November 30, 2010.
